I love this game. My only grip is that I wish that Nettain had a steamier route. I really like the character and I feel he is deprived... XD. MEGA LAZER

Sweet jesus I used to play this so much as a kid, it aged well, I still find tons of enjoyment and hype in it  
Can't let the red army win

Also the easter eggs are pretty neat

M E G A L A Z E R. I bought this one because of a Steam coupon I got. And for that price it turned out quite a good game.

A bit of bomberman clone, a bit of stealth (hide in the shadows) game, a bit of puzzle. Maybe it becomes a bit repetitive early, but still \u2013 for this price and that simple rules and graphics, it is quite an enjoyable game.

There is one thing, though, which makes me not to recommend this game: the 'Recommend this game' buttons in the game. \u2013Recommendation by convenience\u2013 only spoils ratings and should not be accepted or even allowed.. If you like Doom/Doom 2, this game is absolutely worth \$5 to you. No jumping, no plot, lots of bad guys. The graphics and music do a good job setting the tone. The enemies are challenging and numerous. The level design is fairly basic but secrets help add variety. Very barebones menu and options - you can't rebind controls, so if you don't like WASD you're out of luck.

Give it a try!. You really don't need to know anything. Worth a grab.. This is just a garbage game in my opinion.

The gameplay is filled with lags and bugs.

They even want you to pay for this trash.

It's basically just a really weird experience.

The controls are just painful to play with.

I really don't recommend you to play this.

This game deserves only a negative review.

There just isn't anything positive to be said.

---

I personally recommend this game 100 percent, trigger warning though for some very dubiously consensual sexual scenes and sometimes straight up♥♥♥♥♥♥ If you are sensitive about that you should probably not play this game. That is not all this game is though, and that is why everyone else should give it a shot. The story is complex and every route you play through gives you one more piece of the puzzle of what exactly happened here all those years ago that twisted the main protagonist into this vengeance driven hate filled person.

The music is awesome, the art is beautifully detailed.

Two things tho, sometimes there is like five-ten seconds of silence between every music loop and it can feel very jarring, bringing you out of the immersion. A very minor thing I know, but it was just something that I picked up on that bothered me.

Secondly, the sentences are sometimes awkwardly worded and probably not the best translated, and there are some misspelled words and sometimes they post the exact same sentence two times in a row, but it's all minor flaws and barely distract from the story, if at all.. If you like Alternative RPGs, this is a greeeeeaaaat one, as good as puzzle quest 1, different though. cool game,.. Fun, but the latest update is showing Generik.EMLACCH being picked up during a threat hueristics scan, and something is phoning home from the offending code. I ask the developer to update their virus scanner, rebuild, and update on steam again soon. Untill then, I have to remove it.. Totally got 39 pence out of this game. Don't buy full price, Needs more tracks and online and would be great.. I have Waited for this Game Series to become Available for Mac Computers for Years, I am very happy I bought this Game. The Graphics of the game are great! The variety of Missions is very well Done and the Difficulty is just right. I would recommend this game to anyone looking for a Real time, Strategy Firefighting game for Mac and even Windows. It has a Much Different feel to the game that makes it Different from other games. Many different Vehicles and Characters to choose from. The Equipment is well done and Works great. I give this game 5 Stars. :P. I could recommend this game to a younger audience. I came into this expecting a somewhat deeper kind of experience. The bat and ball game is annoying because it's a tad repetitive and doesn't really ask for much strategic thinking nor reflexes. It would be cool if you had to hit a moving ball like you do in the next game I'm going to talk about.

The 3D air hockey game has its moments. But hitting balls with shields just isn't that satisfying. The game, and only game this needed to be, was the ball and bat but in a small area like the 3D air hockey mode with tiles that incrementally come toward you until they reach you and its game over. That would have been a fun game.

The arrow shooter game I found to be a bit tedious. Holding out a bow like that for a long time also strains your arm too much and makes the amount of time you can play the mode limited.

Anyway, if you're 34 like me and want something deep enough to sink your teeth in, maybe look elsewhere. But if you're 12 and under, well, what are you doing? VR headsets aren't designed for kids. . .
